²Faculty of Veterinary and Animal Sciences, Islamia University of Bahawalpur, Bahawalpur, Pakistan.

Supplementary Fig. S1. Thoracic and abdominal X-ray and ultrasonographic images showing pleural effusion (A) and typical nodular lesions in the spleen (B and C).

Supplementary Fig. S2. The histopathological examination of lymphoma in dogs (A), H and E staining for lymphoma cell; the cytological appearance of an immunocytochemical staining for CD3 (B) and CD79a (C) on a lymph node aspirate demonstrating CD79a-reactivity for the neoplastic B-cells and CD3-reactivity for the reactive T-cells consistent with a high-grade B-cell lymphoma). The tumor cells were large and showed a pleomorphic appearance, and the boundaries between the cells were obvious and showed a patchy pattern.
